***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-3 and 6 the allowability in combination with the claimed features is because nowhere in the prior art is there an electrolytic capacitor having the anode lead frame at the portion for junction where a contact area over which the anode lead frame comes into actual contact with the anode lead being smaller than an area of the portion for junction. Regarding claims 4 and 7 the allowability in combination with the claimed features is because nowhere in the prior art is there an electrolytic capacitor having a contact resistance enlarging portion that is formed at the portion for junction by forming a front end portion of the anode lead frame or the anode lead to an angular shape or a notched shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
